The Municipality of Tábua informs that the water supply system in our county is practically established, and that there are only small breaks in the network.

It should also be mentioned that our services have done everything together with the company Águas do Planalto to restore the normal functioning of the water supply system as quickly as possible.

We are grateful for the understanding of all and the collaboration of the entire population, namely in the detection / information of places with water losses / breaks, which influence the water flow of the dwellings.

PAVILHÃO MULTIUSOS

Schedule:
Monday to Sunday
09h00m – 22h00m

NOTE 1: In case of an anomaly in the water supply, the services of the company Águas do Planalto present in this information should be contacted.

NOTE 2: Persons whose dwellings have a very small flow of water may bathe in the facilities of the Multiusos de Tábua Pavilion, at the time mentioned herein.
